

SUBJECT AUDIT FORM

It is important to make sure you are studying the right things! Although it can be tempting to spend time on the topics you know well, you are much more efficient when you focus on the ones you are struggling with the most!

Use our [checklist](#) for each standard to identify the sub-topics you are struggling with the most - then allocate your time accordingly.

We suggest assigning each topic a ranking out of 5 (**1 = I'm killing this, 5 = send help**), then dividing up your time so that you are spending the majority of your time on the 5's - and the least of your time on the 1's. You can then use the audit form to make a detailed study plan for tackling each standard!

STANDARD NAME: _____

Checklist Item/Section	Rank	Time allocated to study	Things I want to focus on when studying
