Equity ratio	Owners' equity		
	Total assets		
Percentage change	Year 2 – Year 1	× 100	
	Year 1	× 100	

RESOURCE B

Kobe is a student who owns a small business named ARTZ, selling his own and his friends' art work.

He purchases the art work from his friends at a reasonable cost, and he does not want to pay any less to his friends. His own art work does not cost anything because his supplies are provided by his family as presents.

Kobe sells his art work through word of mouth and in a local gallery. During the year, he started also selling his artwork online.

Kobe has seen increased sales in the past year.

Kobe does not advertise and does not wish to pay for advertising.

The distribution costs include gallery expenses. For every painting sold, the gallery charges Kobe a display fee.

The table below summarises the Income Statement for ARTZ for the year ended 31 March 2016.

	\$
Sales	18000
Cost of goods sold	7 200
Gross profit	10800
Distribution costs	
Gallery expenses	2 500
Courier expenses	600
Mobile phone and Internet expenses	500
Administrative expenses	1 300
Finance costs	500
Profit for the year	5400

ARTZ Income Statement summary for the year ended 31 March 2016
